

Salesforce Graph Database Use Cases

Primary Use Cases

1. Identify High-Risk Accounts

Objective: Find accounts that have both open support cases AND active sales opportunities

Business Value:

- Prevent deals from falling through due to unresolved support issues
- Prioritize support resources for accounts with revenue at stake
- Proactive account management to protect pipeline

Key Metrics:

- Number of accounts with open cases + active opportunities
- Total opportunity value at risk
- Case priority levels affecting active deals
- Accounts with escalated cases and hot opportunities

2. Optimize Case Assignment

Objective: Intelligently assign new support cases to the best available case owner

Assignment Criteria:

- **Workload Balance:** Distribute cases evenly across available agents
- **Industry Expertise:** Match case owners to accounts in industries they know
- **Account Familiarity:** Prefer case owners who have worked with the account before
- **Skill Matching:** Assign technical cases to technically skilled agents

Business Value:

- Faster case resolution times
- Better customer experience
- Reduced case reassignments
- Improved agent productivity

Secondary Use Cases

3. Lead Conversion Analysis

- Track which leads convert to opportunities
- Identify patterns in successful conversions
- Understand lead source effectiveness

4. Account Relationship Mapping

- Visualize all touchpoints with an account
- See complete customer journey
- Identify key decision makers and influencers

5. Opportunity Pipeline Health

- Analyze opportunity progression through stages
- Identify bottlenecks in the sales process
- Predict close rates based on historical patterns

6. Cross-Sell/Up-Sell Opportunities

- Find accounts with successful past purchases
- Identify similar accounts for new product offerings
- Recommend next-best actions for account managers

Graph Queries We Want to Answer

1. Which accounts have both open high-priority cases AND active opportunities over \$100k?
2. What is the total value of opportunities at risk due to open support cases?
3. For a new technical case in the Healthcare industry, which case owner should we assign it to?
4. Show me all accounts where we have multiple contacts in different departments
5. Which case owners have the fastest average resolution time by industry?
6. What is the relationship between case priority and opportunity close rates?
7. Find accounts where we've had successful closed deals but now have escalated cases
8. Which lead sources generate the highest value opportunities?
